Congress is made up of the Senate and the House of Representatives. If there are 100 Senators and 435 Representatives, how many members of Congress are there?
100 + 435 =

A strong, open ended program that helps build critical skills in solving math word problems for children ages 7 and up!

Fascinating features of Washington, D.C. from the Lincoln Memorial to the Washington Monument to a tour of the White House provide a unique forum that motivates students to solve math word problems. With *Stickybear Math Word Problems: Washington, D.C.*, teachers or parents can select exactly the right word problems in addition, subtraction, multiplication, and division...and adjust the program up or down to match each student's progress!

There are over 130 math word problems in the program. And the internal numbers for each problem change every time the problem is used - providing endless variety.

Or, you may add your own problems whenever you choose - customizing the program even more! You can also create and print practice sheets or test masters for off-screen use.

If you answer a word problem incorrectly, *Stickybear Math Word Problems: Washington, D.C.* will display the correct procedure...highlighting the sections of text involved and displaying the correct operations in order.

Stickybear Math Word Problems: Washington, D.C. records and prints report sheets for up to 50 students at a time. The on-screen calculator option allows users to concentrate on problem-solving.
